Tested for cement paste and cement suspension in accordance to the ZTV - RISS

Suitable for :

- | | |
|-----------------------|-------------|
| - Building | - Painter |
| - Building contractor | - Farming |
| - Roofer | - Carpenter |

Description :

Hand membran pump with pressure compensation container and removable lid, in which is the pressure troughput gauge integrated.

A large enough dimensioned metal sheet for the feet brings a good steadiness till the pumping action.

The lenght of the hand lever is so constructed that a tiredness free work is possible.

A pressure compensation of the transporting hose or a transport of the material in a circle can realised with the Y - ball cock of the pump. It is possible to mount any spraying - pistole or any other tool at the end of the transporting hose, which is ending in a GEKA coupling.

Delivery circumference „WM LOKA“ :

- 2 mtr. suck hose with cover and sieve
- 2 mtr. return stroke hose
- 4 mtr. transporting hose

Output : max. 12 ltr. at max. 10 bar

Technical dates : (L x B x H): 500 mm x 200 mm x 1000 mm - weight : 14 kg

Spraying equipment and nozzels for every kind of work also available from the WERNER MADER GmbH.
