

WM mini

Mortar spraying machine
(for pre-mixed materials)

WM mini

- ◆ Capacity*: 0.5 to 8 L/min
- ◆ Rotorspeed various
- ◆ Max. grainsize: up to 3 mm
- ◆ Max. pressure: up to 20 bar
- ◆ Conveyor distance: up to 20 m
- ◆ Electric drive (1.5 kW) with frequency converter
- ◆ For pressing cement paste and cement suspension

* depending on material, hose diameter and hose length

WM mini

Mortar pumping machine for pre-mixed materials

This screw-pump is a robust and easy to handle wet-spraying-machine for several purposes and materials:

- cement mortar (up to 3 mm grain size)
- SPCC mortar (polymer concrete up to 3 mm grain size)
- cement paste
- cement suspension
- Wall painting color (dispersion and lime color)

The screw-pump WM mini has an electrical drive with a frequency converter:
1.5 kW (400 V / 50 cycles / 16 Amps.)

Capacity (output):

0.5 - 8 L/min (theoretical maximum)

for mortar hose size: 19 and 25 mm i.d.

and maximum 3 mm grain size

The recommended capacity of compressed air for wet-spraying:

spraying-nozzle i.d. 8 mm: $\geq 1,0 \text{ m}^3/\text{min}$ at 5 bar

Every spraying machine has a remote control for start and stop (material),
with a cable of 25m.

Technical data:

l x w x h	[mm]	1200x480x700
weight	[kg]	85

For this purpose suiting it gives:

WM-Jetmix 125/180

Turbo compulsory mixer

Spraying equipment and nozzels for every kind of work also available from the
WERNER MADER GmbH.
